

Karmak's Hosting Solution is a secure, cost-effective way to run your business system

Our highly skilled technicians perform all system maintenance, while state-of-the-art security systems protect both hardware and data. Scalable for easy expansion or reduction of server needs, the Hosting Solution helps businesses avoid up-front costs of purchasing and upgrading their equipment for one easy monthly fee.

Karmak Hosting Solution Benefits & Features

◆ **Affordable**

- Reduce up-front hardware purchases and replacement costs
- Easy-to-budget monthly payments cover hardware maintenance and operating system upgrades
- Reduced pricing on certain software for faxing and laser printing

◆ **Efficient**

- Streamline IT needs and free valuable resources for more important tasks
- Regular server maintenance, nightly back-ups and basic system manager functions performed by experienced Karmak technicians
- Price files loaded directly to the server

◆ **Flexible**

- Customizable to meet companies' changing needs, whether they operate one location or 100
- Companies only pay for the capacity they need and can add branches quickly and easily without adding system resources
- Unlimited concurrent users can access the server at any one time

◆ **Reliable**

- Avoid downtime and improve system speed, performance, and security
- RAID arrays provide a level of protection against downtime as a result of disk failure
- Firewall, VPN connectivity, on-site generators, nightly back-up and disaster recovery plans ensure data protection

“We’ve seen over \$50,000 in savings. We have no worries about downtime or scheduling after hours maintenance, and no issues with speed or performance. Plus, we are always ahead of the curve for upgrades and new releases.”

Pat Grobe, CFO/General Manager, Wabash Canada, Kitchener, ON
